Therapeutic Prevention Clinic

Our clinic provides post-exposure management on viral Hepatitis B, Hepatitis C and HIV after needlestick injuries or mucosal contacts of blood/body fluids.

Our Clients

- Our clients should be referred by medical practitioners and must have documented exposure to blood/body fluids within last 6 months.

Our Service

- Risk Assessment
- Counselling
- Health Education
- Prophylaxis
- Follow up Investigations

Confidentiality

- All information is treated with the strictest confidence.

Making Appointment

- The referring medical practitioner should include the following information in the referral:
 1. A brief history of exposure.
 2. Baseline blood tests performed, such as HBsAg, Anti-HBs, Anti-HCV and HIV Ab test.
 3. Treatment given, such as HBIG, Hepatitis B vaccine or HIV chemoprophylaxis etc.
 4. Information, such as presence of blood-borne infection of the source person if known.
- The client should make appointment by telephone (**Tel number: 21 16 2929**) during office hours on Mondays to Fridays.
(Close on Saturdays, Sundays and Public Holidays)

Consultation Session

- By appointment

Important Notice!

- To facilitate follow up management, the referring medical practitioner should forward all the available baseline blood test results to the Therapeutic Prevention Clinic
 - by fax (fax number: 2117 0809) or
 - by mail (see below for address).
- The client should bring along the referral on the date of consultation.

Charges

- Consultation charge of a specialist clinic will be applied to each visit.
