

Open Lecture

# Balancing HIV Prevention and Care - a policy level perspective

Organised by Special Preventive Programme, Centre for Health Protection,  
Department of Health

Date: 20 April 2006

Programme: 6:15pm-6:30pm Registration  
6:30pm-7:10pm Balancing HIV prevention and care-a policy level perspective  
7:10pm-7:30pm Questions & Answers

Venue: Exhibition Hall  
1/F Public Health Laboratory Centre  
382 Nam Cheong Street  
Kowloon

Speaker: Dr. Tim BROWN  
Senior Fellow, Population and Health Studies, East West Centre, Honolulu, Hawaii

Moderator: Prof. Chen Char-nie  
Chairman of Advisory Council on AIDS

Targeted participants: Individuals who are involved or interested in HIV policy development  
or HIV epidemiology

Registration: Please return the reply slip by email [rrc@dh.gov.hk](mailto:rrc@dh.gov.hk) or fax 2338 0534  
by **12 April 2006**. Seats are offered on a first-come-first served basis.  
Availability of seats will be informed by **EMAIL** latest by 18 April 2006

Enquiries: Ms Anita Chu at 2304 6268 or email [rrc@dh.gov.hk](mailto:rrc@dh.gov.hk)

CME/CPD/CNE accreditation: Will be followed up if application is approved  
Please refer to separate document for speaker's information.

Open Lecture

# Balancing HIV Prevention and Care - a policy level perspective

**Tim BROWN**

Senior Fellow, East West Center, Honolulu, Hawaii

Dr. Tim Brown obtained his degree of Bachelor of Science in Astronomy at the California Institute of Technology and the degrees of Master of Science and Doctor of Philosophy in Physics at the University of Hawaii at Manoa.

In the early 90s when Dr. Brown was an assistant professor in Electrical Engineering, he started his work on HIV when he looked into behaviourally-based computer models of HIV spread. His early research in HIV epidemiology was based in Thailand, one of the earliest countries hit by HIV in Asia.

Over the years, Dr. Brown has accumulated extensive research and consultancy experience in HIV epidemiology in many Asian countries including the Philippines, Cambodia, China, Myanmar, Vietnam, and Bangladesh. He is currently a member of the UNAIDS Reference Group on Estimates, Modelling and Projection and the Mapping the AIDS Pandemic Network. His research interests include epidemiological, behavioural and modeling research on HIV/AIDS policy in the Asia-Pacific region and development of models for national estimation and projection of HIV. He has been actively involved in national estimation processes around the region.

Dr. Brown is one of the developers of the Asian Epidemic Model which is being applied in a number of Asian countries with support from USAID the POLICY Project and FHI. His latest research project 'Integrated Analysis and Advocacy' was 'an outgrowth of a growing sense of frustration' when he, and other colleagues, continued to witness growing HIV epidemics in Asia and the Pacific despite substantial knowledge of what constitutes effective interventions in the region.

*Dr. BROWN participated in the external review of the Hong Kong AIDS programme in 1998 as one of the four external consultants, and was the special advisor to the AIDS Prevention and Care Committee (2002-2005). He is the Special Advisor of the current Scientific Committee on AIDS and STIs formed in 2005.*
