## FINAL EIA FOR STAGE I WORK - ADDENDUM NO. 1

### ADDITIONAL INFORMATION

<u>Section</u>	<u>Page</u>	<u>Additions</u>
4.2	4-1	<p>As stated in our report, NSR concentrations are at distances of 140 to 400 m from the construction site boundary. The limits on total source SWL shown in Table 6.4 permit the concurrent use of several pieces of PME on each task. In our report, we provided examples of permitted equipment combinations for embankment construction and revetment/slope protection works. Further permitted equipment combinations for other construction activities are:</p> <ul style="list-style-type: none"><li>• <i>Dredging</i>: 3 suction dredgers, 3 excavators and 6 petrol water pumps would produce a total SWL of about 119 dB(A), which would not exceed a 75 dB(A) daytime noise limit at villages on the Hong Kong side of the Shenzhen River.</li><li>• <i>Construction of Drainage Culverts</i>: 6 vibratory pokers and 2 each of concrete mixer trucks, lorries and concrete pumps would produce a total SWL of about 123 dB(A), which would not exceed a 75 dB(A) daytime limit at villages on the Hong Kong side.</li><li>• <i>Construction Haul Road</i>: 3 bulldozers, 6 dumptrucks and 3 road rollers generate a combined SWL of 121 dB(A), which would not exceed a 75 dB(A) daytime noise limit at villages on the Hong Kong side.</li></ul>

Excavations at Seung Ma Lei Yue Hill are expected to require blasting and the use of a substantial fleet of 20- and 24-tonne dumptrucks. The noise and vibration impacts of blasting have not been assessed, since no information is available concerning blasting techniques. In addition, the impulsive and intermittent nature of blasting noise is significantly different from the more steady nature of PME noise. Neglecting the noise from blasting, a fleet of 18 dumptrucks, 12 bulldozers and 12 excavators would generate a combined SWL of about 128 dB(A). At about 400m, representing the approximate distance between Seung Ma Lei Yue Hill and Lo Wu, this would produce an acceptable facade noise level.

These preliminary assessments are based on the assumption that PME is located within the construction site boundary shown in Drg SZR-01 (Stage I Works Location Plan). They also assume that NSRs are located in the main village settlements. Other assumptions on which the assessment is based, including assumed SWLs for individual pieces of equipment, are contained in the report.

<u>Section</u>	<u>Page</u>	<u>Additions</u>												
8.5.3	8-13	Para 1, line 3, "...contaminated sediments and <u>tight future land-use conditions should be imposed.</u> "												
9.1.1	9-1	China already has entered into a number of bilateral agreements to protect migratory birds. These include agreements with both Japan and Australia. Birds passing through the Deep Bay area are known to migrate to/from both of these countries (see, for example: Melville, D.S. and Galsworthy, A.C. 1993. Report on bird ringing in Hong Kong in 1992. Hong Kong Bird Report 1992: 81-99) and thus these agreements are relevant in the context of this study. A list of birds occurring in the Deep Bay area protected under bilateral migratory bird agreements between China and Australia/Japan is given in Attachment 1.												
9.6	9-18	Monitoring details are currently being revised with respect to future management of the Lok Ma Chau bend.												
Appendix 9.3	Appe 9-6	Appendix 9.3 includes extracts from the relevant statutes in the PRC. It should be noted that in part 4, 'The National Protection List of Important Wild Animals', the list of species given is incomplete. Furthermore, we are unaware of any documented records from Deep Bay of the following species listed:												
		<table> <tbody> <tr> <td>Chinese Merganser</td> <td><i>Mergus squamatus</i></td> </tr> <tr> <td>Golden Eagle</td> <td><i>Aquila chrysaetos</i></td> </tr> <tr> <td>White-tailed Eagle</td> <td><i>Haliaeetus albicilla</i></td> </tr> <tr> <td>Slavonian Grebe</td> <td><i>Podiceps auratus</i></td> </tr> <tr> <td>Painted Stork</td> <td><i>Ibis leucocephalus</i></td> </tr> <tr> <td>White-fronted Goose</td> <td><i>Anser albifrons</i></td> </tr> </tbody> </table>	Chinese Merganser	<i>Mergus squamatus</i>	Golden Eagle	<i>Aquila chrysaetos</i>	White-tailed Eagle	<i>Haliaeetus albicilla</i>	Slavonian Grebe	<i>Podiceps auratus</i>	Painted Stork	<i>Ibis leucocephalus</i>	White-fronted Goose	<i>Anser albifrons</i>
Chinese Merganser	<i>Mergus squamatus</i>													
Golden Eagle	<i>Aquila chrysaetos</i>													
White-tailed Eagle	<i>Haliaeetus albicilla</i>													
Slavonian Grebe	<i>Podiceps auratus</i>													
Painted Stork	<i>Ibis leucocephalus</i>													
White-fronted Goose	<i>Anser albifrons</i>													
		<p>None of these is known from Hong Kong (Chalmers, M.L. 1986. <i>Annotated Checklist of the Birds of Hong Kong</i>. Hong Kong Bird Watching Society, Hong Kong; Hong Kong Bird Watching Society unpublished records). Also none was recorded at Fu Tian by Deng Juxie and Guan Guanfen (1986) Preliminary study of the birds in the Futien mangrove and bird reserve, pp. 11-17 in: <i>Compilation of technological information on Neilingting Island (Futien) Nature Reserve, Shenzhen, Guangdong Province</i>. Compiled by Management Office of Neilingting Island (Futien) Nature Reserve, Shenzhen, Guangdong Province, September 1986. (in Chinese).</p> <p>A number of other species included in the PRC protection list have been recorded from the Deep Bay area and these are listed in Attachment 2.</p>

	Appe 9-15	Source of data for Figures 1, 2 and 3 is 'Courtesy of the Hong Kong bird watching Society'.						
	Appe 9-17	Source of data for Figure 4 is 'after Young (1994)'.						
	Appe 9-18	Key for Figure 5 is as follows:						
		• egretry						
		 3 km radius around egretry						
	Appe 9-20	Source of data for Figure 8 is 'after Sutherland and Parker (1985)'						
Appendix 9.6	Appe 9-28	<p>The conversion from paddy to fish pond in the Lok Ma Chau bend area had begun by late 1979. By 1981, 2/3 of the area was fish pond and adjacent areas of paddy were similarly being converted to fish pond. By 1983 virtually all of the Lok Ma Chau bend and adjacent areas in Shenzhen were fish ponds (Hong Kong air photos ref. 28440R, 30 November 1979; 38074R/38053R, 19 May 1981, 4476, 10 October 1982; 51440R, 30 November 1983). During this same period the Shenzhen government was reported to be promoting the maximisation of fishery resources as a result of which "a vigorous programme of dike construction and pond excavation was being undertaken" (Wong, K.Y. (ed.).1982. Shenzhen Special Economic Zone. China's experiment in modernization. Hong Kong Geographical Association, Hong Kong). The low diversity of wetland plant species is thus expected.</p> <p>As reported previously, the area of fish ponds in the Lok Ma Chau bend is used by waterfowl, notably egrets and herons including birds apparently breeding in the nearby colonies at Mai Po Village, Mai Po gei wai, Lok Ma Chau and Ho Sheung Heung.</p>

<u>Section</u>	<u>Page</u>	<u>Additions</u>												
Appendix 9.9	Appe 9-43	Section 3.1: Missing Table 1 included in Attachment 4.												
	Appe 9-44	Section 6: Attempts are made in the present exclusion manipulations to reduce this problems. Cages are re-sampled after only two weeks to reduce the amount of other, confounding predators taking refuge in the cages masking the predation effects of the birds. Still, burrow densities appear elevated inside the cages after two weeks. Cage dimensions are 5 metres on a side to tend to reduce the numbers of invertebrate prey emigrating, and cages are sampled close to the centre. Watching bird behaviour around the cages indicates that birds are deterred from the cages: foraging individuals will turn around and walk the other way when they encounter a cage. Nevertheless, Black-headed Gulls <i>Larus ridibundus</i> occasionally have been seen fluttering down in flight to take inside two cages, and wader-sized bird droppings have been seen inside some cages. Still, the overall predation pressure is much greater outside the cages than within, and the experimental design is statistically powerful enough to detect an effect. the problem with birds preying within the cages only means that the birds are eating more than we can measure. Biomass comparisons within and outside cages will detect any bias, owing to differential juvenile settlement, in abundance within versus outside cages. The biomass analysis is incomplete.

### BIRDS OCCURRING IN THE DEEP BAY AREA PROTECTED UNDER BILATERAL MIGRATORY BIRD AGREEMENTS BETWEEN CHINA AND AUSTRALIA/JAPAN

Black-necked Grebe	<i>Podiceps nigricollis</i>	J
Great Crested Grebe	<i>Podiceps cristatus</i>	J
Lesser Frigatebird	<i>Fregata ariel</i>	A
Bittern	<i>Botaurus stellaris</i>	J
Cattle Egret	<i>Bubulcus ibis</i>	AJ
Reef Egret	<i>Egretta sacra</i>	A
Great Egret	<i>Egretta alba</i>	AJ
Yellow Bittern	<i>Ixobrychus sinensis</i>	AJ
Schrenck's Bittern	<i>Ixobrychus eurhythmus</i>	J
Little Green Heron	<i>Butorides striatus</i>	J
Intermediate Egret	<i>Egretta intermedia</i>	J
Night Heron	<i>Nycticorax nycticorax</i>	J
Purple Heron	<i>Ardea purpurea</i>	J
Black Stork	<i>Ciconia nigra</i>	J
Glossy Ibis	<i>Plegadis falcinellus</i>	A
White Spoonbill	<i>Platalea leucordia</i>	J
Black-faced Spoonbill	<i>Platalea minor</i>	J
Ruddy Shelduck	<i>Tadorna ferruginea</i>	J
Shelduck	<i>Tadorna tadorna</i>	J
Pintail	<i>Anas acuta</i>	J
Teal	<i>Anas crecca</i>	J
Baikal Teal	<i>Anas formosa</i>	J
Falcated Teal	<i>Anas falcata</i>	J
Mallard	<i>Anas platyrhynchos</i>	J
Gadwall	<i>Anas strepera</i>	J
Wigeon	<i>Anas penelope</i>	J
Garganey	<i>Anas querquedula</i>	AJ
Shoveler	<i>Anas clypeata</i>	AJ
Common Pochard	<i>Aythya ferina</i>	J
Baer's Pochard	<i>Aythya baeri</i>	J
Tufted Duck	<i>Aythya fuligula</i>	J
Scaup	<i>Aythya marila</i>	J
Red-breasted Merganser	<i>Mergus serrator</i>	J
White-bellied Sea Eagle	<i>Haliaeetus leucogaster</i>	A
Marsh Harrier	<i>Circus aeruginosus</i>	J
Hobby	<i>Falco subbuteo</i>	J
Japanese Quail	<i>Coturnix coturnix</i>	J
Watercock	<i>Gallicrex cinerea</i>	J
Moorhen	<i>Gallinula chloropus</i>	J
Pheasant-tailed Jacana	<i>Hydrophasianus chirurgus</i>	A
Painted Snipe	<i>Rostratula benghalensis</i>	AJ
Little Ringed Plover	<i>Charadrius dubius</i>	A
Ringed Plover	<i>Charadrius hiaticula</i>	A
Lesser Sand Plover	<i>Charadrius mongolus</i>	AJ
Greater Sand Plover	<i>Charadrius leschenaultii</i>	AJ
Oriental Plover	<i>Charadrius veredus</i>	A
Lapwing	<i>Vanellus vanellus</i>	J
Grey Plover	<i>Pluvialis squatarola</i>	A

Asiatic Golden Plover	<i>Pluvialis fulva</i>	AJ
Little Whimbrel	<i>Numenius (borealis) minutus</i>	A
Whimbrel	<i>Numenius phaeopus</i>	J
Curlew	<i>Numenius arquata</i>	AJ
Eastern Curlew	<i>Numenius madagascariensis</i>	AJ
Black-tailed Godwit	<i>Limosa limosa</i>	AJ
Bar-tailed Godwit	<i>Limosa lapponica</i>	AJ
Spotted Redshank	<i>Tringa erythropus</i>	J
Redshank	<i>Tringa totanus</i>	AJ
Marsh Sandpiper	<i>Tringa stagnatilis</i>	AJ
Greenshank	<i>Tringa nebularia</i>	AJ
Green Sandpiper	<i>Tringa ochropus</i>	J
Wood Sandpiper	<i>Tringa glareola</i>	AJ
Nordmann's Greenshank	<i>Tringa guttifer</i>	J
Common Sandpiper	<i>Tringa hypoleucos</i>	AJ
Grey-rumped Sandpiper	<i>Tringa brevipes</i>	AJ
Terek Sandpiper	<i>Xenus cinerea</i>	AJ
Turnstone	<i>Arenaria interpres</i>	AJ
Swinhoe's Snipe	<i>Gallinago megala</i>	AJ
Pintail Snipe	<i>Gallinago stenura</i>	A
Common Snipe	<i>Gallinago gallinago</i>	J
Woodcock	<i>Scolopax rusticola</i>	J
Asiatic Dowitcher	<i>Limnodromus semipalmatus</i>	A
Red Knot	<i>Calidris canutus</i>	AJ
Great Knot	<i>Calidris tenuirostris</i>	AJ
Red-necked Stint	<i>Calidris ruficollis</i>	AJ
Long-toed Stint	<i>Calidris subminata</i>	AJ
Temminck's Stint	<i>Calidris temminckii</i>	J
Sharp-tailed Sandpiper	<i>Calidris acuminata</i>	AJ
Dunlin	<i>Calidris alpina</i>	AJ
Curlew Sandpiper	<i>Calidris ferruginea</i>	AJ
Sanderling	<i>Calidris alba</i>	AJ
Spoon-billed Sandpiper	<i>Eurynorhynchus pygmeus</i>	J
Broad-billed Sandpiper	<i>Limicola falcinellus</i>	AJ
Ruff	<i>Philomachus pugnax</i>	AJ
Black-winged Stilt	<i>Himantopus himantopus</i>	J
Avocet	<i>Recurvirostra avosetta</i>	J
Red-necked Phalarope	<i>Phalaropus lobatus</i>	AJ
Grey Phalarope	<i>Phalaropus fulicarius</i>	AJ
Oriental Pratincole	<i>Glareola maldivarum</i>	AJ
Common Gull	<i>Larus canus</i>	J
Herring Gull	<i>Larus argentatus</i>	J
Slaty-backed Gull	<i>Larus schistisagus</i>	J
Black-headed Gull	<i>Larus ridibundus</i>	J
Kittiwake	<i>Rissa tridactyla</i>	J
Common Tern	<i>Sterna hirundo</i>	AJ
Little Tern	<i>Sterna albifrons</i>	AJ
Ancient Auk	<i>Synthliboramphus antiquus</i>	J
Oriental Cuckoo	<i>Cuculus saturatus</i>	AJ
Short-eared Owl	<i>Asio flammeus</i>	J
White-throated Needletail	<i>Hirundapus caudacutus</i>	AJ
Pacific Swift	<i>Apus pacificus</i>	AJ
Little Swift	<i>Apus affinis</i>	J

Sand Martin	<i>Riparia riparia</i>	J
Swallow	<i>Hirundo rustica</i>	AJ
Red-rumped Swallow	<i>Hirundo daurica</i>	AJ
Asian House Martin	<i>Delichon dasypus</i>	J
Forest Wagtail	<i>Dendronanthus indica</i>	J
Yellow Wagtail	<i>Motacilla flava</i>	AJ
Citrine Wagtail	<i>Motacilla citreola</i>	AJ
White Wagtail	<i>Motacilla alba</i>	AJ
Richard's Pipit	<i>Anthus novaeseelandiae</i>	J
Olive-backed Pipit	<i>Anthus hodgsoni</i>	J
Pechora Pipit	<i>Anthus gustavi</i>	J
Red-throated Pipit	<i>Anthus cervinus</i>	J
Water Pipit	<i>Anthus spinoletta</i>	J
Ashy Minivet	<i>Pericrocotus divaricatus</i>	J
Tiger Shrike	<i>Lanius tigrinus</i>	J
Brown Shrike	<i>Lanius cristatus</i>	J
Black-naped Oriole	<i>Oriolus chinensis</i>	J
Chestnut-cheeked Starling	<i>Sturnus phillipensisq</i>	J
Red-tailed Robin	<i>Lucinia sibilans</i>	J
Siberian Rubythroat	<i>Lucinia calliope</i>	J
Siberian Blue Robin	<i>Lucinia cyane</i>	J
Red-flanked Bluetail	<i>Tarsiger cyanurus</i>	J
Daurian Redstart	<i>Pheonicurus auroreus</i>	J
Stonechat	<i>Saxicola torquata</i>	J
Siberian Thrush	<i>Zoothera sibirica</i>	J
White's Thrush	<i>Zoothera dauma</i>	J
Grey-backed Thrush	<i>Turdus hortulorum</i>	J
Grey Thrush	<i>Turdus cardis</i>	J
Pale Thrush	<i>Turdus pallidus</i>	J
Eye-browed Thrush	<i>Turdus obscurus</i>	J
Dusky Thrush	<i>Turdus naumanni</i>	J
Short-tailed Bush Warbler	<i>Cettia squameiceps</i>	J
Middendorff's Grasshopper Warbler	<i>Locustella ochotensis</i>	J
Lanceolated Warbler	<i>Locustella lanceolata</i>	J
Great Reed Warbler	<i>Acrocephalus arundinaceus</i>	AJ
Black-browed Reed Warbler	<i>Acrocephalus bistrigiceps</i>	J
Yellow-browed Warbler	<i>Phylloscopus inornatus</i>	J
Arctic Warbler	<i>Phylloscopus borealis</i>	AJ
Pale-legged Leaf Warbler	<i>Phylloscopus tenellipes</i>	J
Eastern Crowned Warbler	<i>Phylloscopus coronatus</i>	J
Yellow-rumped Flycatcher	<i>Ficedula xanthopygia</i>	J
Narcissus Flycatcher	<i>Ficedula narcissina</i>	J
Mugimaki Flycatcher	<i>Ficedula mugimaki</i>	J
Blue-and-White Flycatcher	<i>Cyanoptila cyanomela</i>	J
Sooty Flycatcher	<i>Muscicapa sibirica</i>	J
Grey-streaked Flycatcher	<i>Muscicapa griseisticta</i>	J
Brown Flycatcher	<i>Muscicapa latirostris</i>	J
Japanese Paradise Flycatcher	<i>Terpsiphone atrocaudata</i>	J
Ruddy Sparrow	<i>Passer rutilans</i>	J
Brambling	<i>Fringilla montifringilla</i>	J
Siskin	<i>Carduelis spinus</i>	J
Black-tailed Hawfinch	<i>Eophona migratoria</i>	J
Yellow-breasted Bunting	<i>Emberiza aureola</i>	J

Black-faced Bunting	<i>Emberiza spodocephala</i>	J
Japanese Yellow Bunting	<i>Emberiza sulphurata</i>	J
Chestnut-eared Bunting	<i>Emberiza fucata</i>	J
Rustic Bunting	<i>Emberiza rustica</i>	J
Little Bunting	<i>Emberiza pusilla</i>	J
Tristram's Bunting	<i>Emberiza tristrami</i>	J
Pallas's Reed Bunting	<i>Emberiza pallasi</i>	J
Reed Bunting	<i>Emberiza schoeniculus</i>	J

\* These species are listed under:

(A) - Agreement between the Government of Australia and the Government of the People's Republic of China for the Protection of Migratory Birds and Their Environment

and

(J) - Agreement on the Protection of Migratory Birds and Their Habitats by the Governments of Japan and the People's Republic of China.

APPENDIX 9.9      INTERIM REPORT INVERTEBRATE SURVEY - HONG KONG

Table 1      Alphabetical Listing of Morhospecies codes

code	Phylum	Class	Subclass	Order	(Super)Family	Genus	species
abre	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Assimineidae	Assiminea	
acon	Annelida		Errantia		Pilargiidae	Ancistroylis	constricta
		Polychaeta					
anem	Echinodermata		Holothuroidea	Apoda			
asp	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Assimineidae	Assiminea	sp.
asp1	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Assimineidae	Assiminea	sp1.
asp2	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Assimineidae	Assiminea	sp2.
asp3	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Assimineidae	Assiminea	sp3.
asp4	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Assimineidae	Assiminea	sp.4
bivl	Mollusca	Bivalvia	Lamellibranchia	Heterodonta			
blon	Mollusca	Gastropoda	Opisthobranchia	Cephalaspidea			
brog	Annelida	Oligochaeta					
cap?	Annelida	Polychaeta	Sedentaria		Capitellidae		
ccap	Annelida	Polychaeta	Sedentaria		Capitellidae		
ceph	Mollusca	Gastropoda	Opisthobranchia	Celphalaspidea			
clen	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Hydobiidae		
dost	Mollusca	Gastropoda	Prosobranchia			Dostia	
dpin	Annelida	Polychaeta	Errantia		Nereidae	Dendronereis	sp
glau	Mollusca	Bivalvia	Lamellibranchia	Heterodonta	(Galeommatacea)		pinnaticirrus
euni	Annelida	Polychaeta	Errantia		Eunicidae		
goby	Vertebrata		Teleostei				
glyl	Annelida	Polychaeta	Errantia		(Glyceracea)		
hsim	Annelida	Polychaeta	Sedentaria		Maldanidae	Heteromastus	similis
ibom	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Iravidiidae	Iravadia	bombayanna
iljv	Arthropoda	Crustacea	Malacostraca	Decapoda	Ocypodidae	Ilyoplax	sp.
ils2	Arthropoda	Crustacea	Malacostraca	Decapoda	Ocypodidae	Ilyoplax	sp.2
inin	Arthropoda	Crustacea	Malacostraca	Decapoda	Ocypodidae	Ilyoplax	ningpoensis
ins1	Arthropoda	Insecta					
ins2	Arthropoda	Insecta					
iorn	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Iravidiidae	Iravadia	ornata
irs2	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Iravidiidae	Iravadia	sp2
itan	Arthropoda	Crustacea	Malacostraca	Decapoda	Ocypodidae	Ilyoplax	tanshuiensis
laem	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda		Laemodonta	sp.

laon	Annelida	Polychaeta	Sedentaria		Sabellidae	Laonome	sp.
lgog	Annelida	Polychaeta					
lin1	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Pyramidellidae	Linopygra	sp.1
lin2	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Pyramidellidae	Linopygra	sp.2
mac	Mollusca	Bivalvia	Lamellibranchia	Heterodonta		Macoma	sp.
mald	Annelida	Polychaeta	Sedentaria		Maldanidae		
mcro	Arthropoda	Crustacea	Malacostraea	Decapoda	Ocypodidae	Macrophithalamus	sp.
m nep	Annelida	Polychaeta			Capitellidae		
msan	Annelida	Polychaeta			Eunicidae	Marphysa	
msen	Mollusca	Bivalvia	Lamellibranchia	Anisomyaria		Musculista	sanguinea
nam1	Annelida	Polychaeta	Errantia		Neredidae		
nam2	Annelida	Polychaeta	Errantia		Nereidae		
nema	"nematoda"						
neme	Nemertean						
ngla	Annelida	Polychaeta	Errantia		Nereidae	Neanthes	glandicincta
nmn2	Annelida	Polychaeta	Errantia		Nereidae		
npol	Annelida	Polychaeta	Errantia		Syllidae	Nephtys	polybranchiata
odos	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Pyramidellidae	Odostromia	sp.
olig	Annelida	Oligochaeta					
owen	Annelida	Polychaeta	Sedentaria		Oweniidae		
pcir	Annelida	Polychaeta	Sedentaria		Spionidae	Prionospio	cirrifera
phyl	Annelida	Polychaeta	Errantia		Phyllodocidae		
plan	Platyelminthes						
plep	Annelida	Polychaeta	Sedentaria		Sabellidae	Potamilla	leptochaeta
ply1	Annelida	Polychaeta	Errantia		Polynoidae		
ply2	Annelida	Polychaeta	Errantia		Polynoidae		
plyd	Annelida	Polychaeta	Sedentaria		Spionidae	Polydora	sp.
pmai	Mollusca	Bivalvia	Lamellibranchia	Heterodonta	(Galeommatacea)	Pseudopythna	maipoeneis
poto	Mollusca	Bivalvia	Lamellibranchia	Heterodonta		Potomocorbula	sp.
pull	Annelida	Polychaeta	Sedentaria		Capitellidae		
pyr2	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Pyramidellidae		
sab?	Annelida	Polychaeta	Sedentaria		Sabellidae		
scon	Mollusca	Bivalvia	Lamellibranchia	Heterodonta	(Solenacea)	Sinonovacula	constricta
serm	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda		Sermyla	tornatella
sesr	Arthropoda	Decapoda	Malacostraca	Decapoda	Grapsidae		
sfra	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Amphibolidae	Salinator	fragilis
spi1	Arthropoda	Arachnida		Araneae			
spi2	Arthropoda	Arachnida		Araneae			
spio	Anneldia	Polychaeta	Sedentaria		Spionidae		

ste1	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Stenothyridae	Stenothyra	sp.1
ste2	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Stenothyridae	Stenothyra	sp.2
ste3	Mollusca	Gastropoda	Prosobranchia	Mesogastropoda	Stenothyridae	Stenothyra	sp.3
tcf1	Mollusca	Bivalvia	Lamellibranchia	Heterodonta		Theora	cf.iridescens
thar	Annelida	Polychaeta	Sedentaria		Cirratulidae		
that	Mollusca	Bivalvia	Lamellibranchia	Heterodonta		Theora	lata
uca	Arthropoda	Crustacea	Malacostraca	Deopoda	Ocypodidae	Uca	ap.

## APPENDIX 9.11

### INTERIM REPORT ON DUCK AND WADER DISTRIBUTION IN DEEP BAY

▲ Mudflat Hide  
● Boardwalk Hide

6 - March 1994	
<u>1400</u>	500m
(G)	716 Avocet
(H)	140 Asiatic Golden Plover
(I)	100 Curlew
<u>1430</u>	200m
(I)	120 curlew everything else departed
<u>1500</u>	100m
(J)	500 Curlew
(K)	235 Grey Plover
<u>1515</u>	Mud covered

## APPENDIX 9.11

### INTERIM REPORT ON DUCK AND WADER DISTRIBUTION IN DEEP BAY

▲ Mud flat Hide  
● Boardwalk Hide

6-March 1994	
<u>0145</u> Tide 1100m	
(A) 1310 Dunlin / Kentish Plover	70% foraging
(B) 140 Kentish Plover	70% foraging
(C) 100s Kentish Plover	70% foraging
<u>0940</u> Tide 1100m	
only flock A still present	
(A) 1710 Dunlin / Kentish Plover	70% foraging
<u>1000</u> 1100m	
No change	
<u>030</u> 1100m	
(A) unchanged	
(B) 511 Grey Plover	60% foraging
(C) 627 Avocet	100% foraging
<u>1100-1200</u> 1100m	
No change	
<u>1215</u> 1100m	
(A) 1930 Dunlin / Kentish Plover	60% foraging
<u>230</u> 1100m	
No change	
<u>300</u> 1100m	
Plus	
(F) 420 Dunlin / Kentish Plover	50% foraging
<u>330</u> 850m	
only (F) still present	
(F) 300 Dunlin	all foraging
150 Kentish Plover	all foraging
