

APPENDIX 8I

**Dragonfly species
recorded within the
Study Area**

Appendix 8I Dragonfly species recorded within the Study Area (consultants' data)

Species	CL	M	PL	S	W	Commonness and distribution
Species recorded within point count locations						
<i>Euphaea decorata</i>	3		1		3	CW
<i>Agriocnemis femina</i>	8		1	3		AW
<i>Ischnura senegalensis</i>	6			4		AW
<i>Orthetrum chrysis</i>				2		CW
<i>Orthetrum luzonicum</i>	4				2	CW
<i>Orthetrum pruinosum</i>	1	1	1	1	1	AW
<i>Orthetrum sabina</i>		2			1	AW
<i>Neurothemis fulvia</i>	1				1	CW
<i>Trithemis aurora</i>	2		1	4	1	AW
<i>Trithemis festiva</i>	1			2		AW
<i>Palpopleura sexmaculata</i>	2				1	CW
<i>Pantala flavescens</i>	5	3	17			AW
<i>Rhyothemis variegata</i>		3				CW
<i>Tramea virginia</i>			1	1	1	CW
<i>Zygonyx iris</i>			1	1		CW
Number of individuals	33	9	24	18	11	
Number of species	10	4	7	8	58	

Habitat: CL = cultivated lands, M = marsh/mangroves, PL = plantation, S = streams, W = woodlands

Commonness: A = abundant, C = common, FC = fairly common, V = vagrant, W = widespread (Wilson 1995, 1997)
