

Examples of Courses accepted as Continuing Professional Development Programmes in Occupational Safety and Health

Continuing Professional Development Programmes (Short or Long Courses)

Pursuant to the Factories and Industrial Undertakings (Safety Officers and Safety Supervisors) Regulations, Continuing Professional Development (“CPD”) programmes for the purpose of renewal or revalidation of registration as safety officers shall be in **occupational safety and health, be relevant to the needs and professional standards of registered safety officers, enhance professional competence and comply with the Guidance Notes on Continuing Professional Development Programmes under the Factories and Industrial Undertakings (Safety Officers and Safety Supervisors) Regulations** (“the Guidance Notes”) issued from time to time by the Commissioner for Labour. Any course that fulfills the aforesaid requirements, irrespective of short or long courses, will be accepted by the Commissioner for Labour as CPD programmes in occupational safety and health.

When a registered safety officer chooses to attend a course that fulfills the aforesaid requirements as a CPD programme, he / she must complete the course. Completion of the course means fulfilling all the course requirements leading to the issue of the certificate of award. If a registered safety officer wishes to claim CPD hours for completion of individual modules / stages of a long course, he / she should make sure before enrollment that: (i) the requirements of the course have spelt out clearly that such course is structured to allow for completion in stages or by modules; and (ii) certificates / proof of attainment would be awarded upon successful completion / fulfilment of all requirements of individual modules / stages of the course.

Through the years, there have been a diversity of courses accepted by the Commissioner for Labour as CPD programmes in occupational safety and health. Some examples are listed below for easy reference of registered safety officers. Please take note that the courses in the following lists are by no means exhaustive and showing our preference.
